

## Imaging and Screening

Under the Affordable Care Act, most insurance plans must cover the following list of preventive services without charging you a copayment. This is true even if you haven't met your yearly deductible. This applies only when these services are delivered by a network provider.

- Breast Cancer Genetic Test Counseling for women at higher risk for breast cancer
- Breast Cancer Mammography screenings every 1 to 2 years for women over 40
- Breast Cancer chemoprevention for women at higher risk
- Well-woman visits, including a full check up and clinical breast exam

If your screenings are not covered, you may be eligible for a health exam and breast cancer screening at no cost if you:

- Are at least 40 years old
- Have limited income
- Have limited or no insurance
- Have a family history

For a complete list of current Komen Columbus Community Health grantees that offer breast screening, [click here](#).
